Hi Dan,

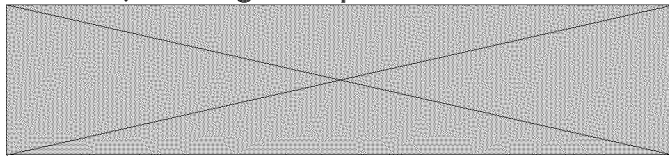

Yep. Those are the only two missing. We can shoot for next year and try to move the sample date up so we don't get squeezed quite as bad by the weather again.

It will probably be about a month before I get anything summarized on the two sites we did do. I will share those results when I get them done.

Thanks!

Jim

Hi Jim

I really appreciate the effort. Almost pulled it off. I take it we are missing A72 and Elk Park?

Hi all,

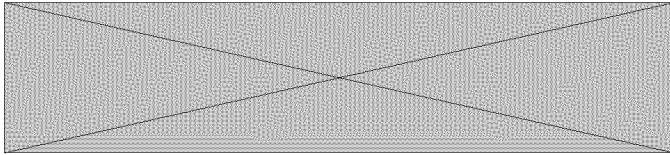

The Animas River is not dropping. As of this morning the gauge below Silverton is at 311 cfs and has hardly budged in the last 3 or 4 days. The river is not going to drop before tomorrow (and the weather forecast sucks) - I think we are done for the year. We will re-schedule for next fall. Thanks for your commitment and help!

Jim
